# Tactic Pro

RT Software's premium-level sports analysis solution

Tactic Pro

Our flagship product, Tactic Pro, is used by top clubs and federations around the world. By leveraging both manual and AI-assisted pitch calibration, our metric tools add pitch overlays and other graphics and allow you to measure speed, distances, heights, etc.

Our industry-leading Artificial Intelligence Player Detect model increases speed and accuracy, allowing you to to create complex analyses sequences in seconds. Given the application's XML ingest and tagging features, Tactic can work as a standalone analysis tool or with other providers.

You can easily transition graphics from video to a virtual stadium and back, letting you change camera angles, display a tactics board view or create animations from scratch to explain your game plan or visualise various training exercises.

You can use your existing laptop to run Tactic Pro. No specialist hardware is required, so you can be up and running in no time.

Buying Tactic Pro is easy too. RT Software offers monthly, quarterly and annual subscriptions subscriptions, which are available in the online store.

Virtually No Learning Curve

It really is that easy to use. The intuitive nature of Tactic means that it can be used straight away. For those who want to become expert users, Tactic provides detailed video tutorials for all of its features.

Interactive Graphics

With our innovative presenter function, you can add graphics live using a touchscreen or a tablet, engaging your players and fostering an interactive learning environment.
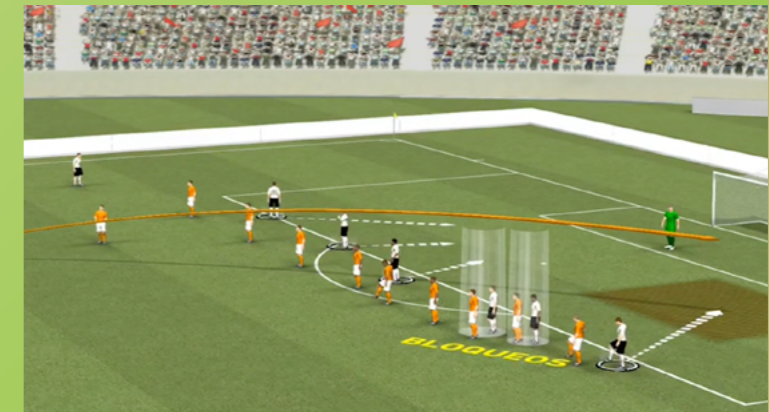

Coach Anywhere

Analysis sequences with all the necessary animations can be simply exported as a clip in any standard format to be replayed anywhere, such as on laptops, tablets or phones.

Use the Virtual Stadium

Our virtual stadium allows you to build animations from scratch. Recreate game scenarios or craft training exercises using any of the tools available for videos, such as virtual goals and balls.

Options Comparison

		Lite	Advanced	Pro	Scout
3D Tools	Matching camera position and angle to add 'on-pitch' graphics	✅	✅	✅	✅
Keying	Chroma keying (with auto function) and segment keying	✅	✅	✅	✅
Timeline	Advanced control of the timing of events within an analysis sequence	❌	✅	✅	✅
Virtual Stadium	A range of virtual stadiums for various sports is available within the software	✅	✅	✅	❌
Presenter Interface/Tablet Control	The second screen allows the presenter to interact using a touch screen or a tablet	✅	✅	✅	❌
Save, Recall and Share Analysis Files	Easily save and load analysis files on any device	✅	✅	✅	✅
Camera Tracking	Track camera movement with one click and stay anchored to a position	❌	✅	✅	✅
AI Player Detect	Player detection allows the automatic tracking of players with easy corrections	❌	Optional	✅	Optional
Virtual Players	Explain tactical movements by adding male or female virtual players on the field	❌	❌	✅	❌
Metrics	Distance, run distance, speed, and angle graphics	❌	❌	✅	❌
AI Pitch Calibration	A field detection feature that allows users to calibrate a pitch with one click	❌	❌	✅	❌
XML Ingest	Ingest event files from data and tagging providers	❌	❌	✅	❌
Tagging	Cut the game clips with the tags you create	❌	✅	✅	✅
Available for Mac and Windows	Supports the two major operating systems	✅	✅	✅	✅

Multi-licence and multi-year discounts are available

Monthly, quarterly and half-year subscriptions are available in our online store.

ABOUT RT SOFTWARE

RT Software is an established graphics solutions company that has been working with leading broadcasters, such as the BBC, Sky Sports, TNT Sports, ITV, ESPN, Fox and many others, since 2004. What defines us is our ability to add graphics to video clips in order to highlight action or explain the gameplay.

Our products for the sports professionals market have evolved from the original top-end systems employed on air to much easier-to-use analysis tools, including powerful data visualisation solutions for recruitment and team management.

We are proud to have worked alongside some of the biggest names in the professional sports world to create these tools.

We have developed our Tactic suite of products (Lite, Advanced, Pro and Scout) to cater to the needs of every level of coaching and performance analysis – from amateur to the highest professional level.

"Tactic Pro has been brilliant for us. The time it takes to animate clips, especially with player detect, is very quick now. The presenter interface and tablet control options are also very good, particularly how quickly you can customise the way you want it to look, from a clean video feed to playlists and composite tools."
